Reports

There are several types of reports that can be generated in this system.

1. Stock reports: These reports provide information on the current inventory levels, stock levels, and reorder points. (You can generate every single product Sale, Quotation, Purchase and etc...)
2. Sales & Purchases reports: These reports provide information on sales & purchases totals, number of transactions and products sold & purchased.
3. Payments Report:
 - a. Purchases
 - b. Sales
 - c. Sales Return
 - d. Purchase Returns

you can generate all these reports separately.

4. Profit and Loss (P&L) reports (income statement reports): Provide information on the financial performance of a business over a certain period of time, such as a month or a year. These reports show the revenue, expenses, and profits of the business. The main purpose of a P&L report is to give a clear picture of the company's financial performance, so that management can take informed decisions and make projections.
 - a. Total Sales
 - b. Total Purchases
 - c. Sales Return
 - d. Purchases Return
 - e. Expenses
 - f. Profit (Sales - Product Cost)
 - g. Payments Received (Payments Sales + Purchases Return)
 - h. Payments Sent (Payments Purchases + Sales Return + Expenses)
 - i. Payments Net (Received - Sent)
5. Product Quantity Alerts
6. Customer Reports: Financial report that shows all the outstanding debts or unpaid balances that a business has with its customers.
7. Supplier Reports: Financial report that shows all the outstanding debts or unpaid balances that a business has with its suppliers.
8. Top Selling Products: Provide information on the products that are selling well in a business, it can be used to identify trends and make decisions about inventory management, marketing, and product development.
9. Best Customers & users Reports: You can use this to promotions.
